Hi all,

Regarding where Bay Area biosolids end up, I asked Synagro if they could provide a county-by-county listing of the Bay Area biosolids they take for land application, ADC, and landfilling, and just got this breakdown from Jeff Faust and Tracy Goolsbee, which is very useful in seeing what went where. Synagro now hauls Bay Area biosolids to several other landfills besides Potrero Hills, and keep records on how much from each facility went for ADC or for landfill. These charts also show other organics besides biosolids that they hauled.

Denali contracted with EBMUD, Livermore, San Leandro, and for about ½ of San Mateo's biosolids for application in Merced County, along with several Central Valley and Central Coast POTWs.

Lauren
